DysTest

Battery of diagnostic tests of specific learning difficulties in university students and applicants for study

DysTest contains tests that provide accurate and complex diagnosis of specific learning disorders (SLD), i.e. dyslexia, dysortographia, and dysgraphia in university students as well as high school graduates and university applicants. The tool is designed solely for Czech native speakers.

DysTest

- » was created during the period 2012–2014 as a part of the Expln project
- » and deals with:
 - › reading skills
 - › language competences
 - › visual and auditory perception
 - › working memory
 - › work pace

Partner Institutions

- » apart from the Teiresiás Centre at Masaryk University, these institutions were involved in creating the tool:
 - › Czech Technical University in Prague (ELSA Centre)
 - › University of West Bohemia
 - › Faculty of Arts at Charles University in Prague
 - › Pedagogical-psychological counselling centre of the Central Bohemia Region

DysTest Tool

- » ensures standardized testing conditions and effective evaluation of the diagnostic results
- » contains inbuilt timers, sound recordings, and norms
- » enables anonymous data collection from the testing, and thus allows for continual adjustment of the norms
- » generates result overviews which can be enclosed to the diagnostic reports and serve as a unifying element, comprehensible for all advisory centres

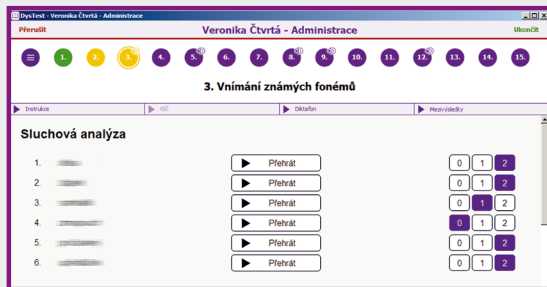

Supported platforms

DysTest Training Course

- » for study counsellors
- » several times every year
- » organized by the Teiresiás Centre

dystest@teiresias.muni.cz

SLD Diagnostics

- » for university students and applicants
- » possible to arrange at any time during the year
- » organized by the Teiresiás Centre and other specialized institutions
